travels, different cultures,
languages, music, theatre,
movies, sports

PERSONAL STATEMENT

I like to design public and private spaces, indoor and outdoor where I can express my creativity, always with special attention to the sustainability of the project and the technological solutions used.

I have a thorough experience in single residential projects being independent and responsible of the whole process from concept design to contract administration, dealing with clients, consultant, suppliers and builders.

I am looking to develop my skills on larger projects.

EDUCATION

june 2012 Registered Architect

july 2011 Master Degree in Architecture at Politecnico di Milano. campus Leonardo | 110/110
